Pipe and tube manufacturers demand industrial-strength equipment to support their need for reliable product identification. Marking systems that are designed for use in harsh industrial environments ensure that product is properly marked without production interruptions.

Pipe & Tube Printers and Marking Systems

Remove the Bowden tube. To loosen and free the Bowden tube from the print head, apply downward pressure on the white tube coupling collet. As you do this, gently pull the Bowden tube up, in the opposite direction. This should remove it from the print head. Do the same for the end of the Bowden tube feeding into the extruder.
