**Iris Vision**

One of the most  
common cataract  
surgery complications

is a posterior capsule  
opacity (also called

posterior capsule  
opacification or PCO).

Although some people  
call PCO a "secondary  
cataract," it really is

not a cataract. Once a  
cataract is removed, it  
does not come back.

**About Vision**

Modern cataract surgery does not allow for any residual cortical matter in the anterior or posterior chamber, not even in the capsular bag. But for a beginner, a residual cortex in the eye is preferable to a ruptured posterior capsule and its associated complications.
