The Archaeology of China: From the Late Paleolithic to the Early Bronze Age. Li Liu, Xingcan Chen. This book explores the roles of agricultural development and advancing social complexity in the processes of state formation in China. Over a period of about 10,000 years, it follows evolutionary trajectories of society from the last Paleolithic hunting-gathering groups, through Neolithic farming villages, and on to the Bronze Age Shang dynasty in the latter half of the second millennium BC.

The Archaeology of China: From the Late Paleolithic to the ...

This well illustrated book about archaeology in China covers ancient Paleolithic cultures through the Qin dynasty that united China in 221 BCE. The author discusses different sites, the artifacts and structures found there, and what that tells us about the society that left them.

Book description. This volume aims to satisfy a pressing need for an updated account of Chinese archaeology. It covers an extended time period from the earliest peopling of China to the unification of the Chinese Empire some two thousand years ago.

The Archaeology of Early China by Gideon Shelach-Lavi

Chinese archaeology has been practiced since the Song dynasty (960-1279) with early practices of antiquarianism. Although native Chinese antiquarianism developed some rigorous methods of unearthing, studying, and cataloging ancient artifacts, the field of archaeology never developed into a branch of study outside of Chinese historiography.
